Below are the complete reviews, written by the Lovereading4kids members.

Sabrina Chorley, age 4

A gloriously illustrated book, perfect for a calm bedtime read.

A gorgeous picture book with a lovely, calming story perfect for bedtime reading. Sabrina loved this and I’m sure much younger children would too. The illustrations are glorious.

Sam, age 7

I loved this book and enjoyed reading with my mum! The pictures are really colourful and bright. We read the book at night and it made me feel really sleepy and I had a lovely sleep after!

I have read some of the author's other books so I was really looking forward to this one. I really loved the pictures because they are bright and colourful.

Ares Yow-Fairs, age 2

I really, really like the pictures!

Olivia Townsend, age 4

This beautiful brightly illustrated book is in Chris Haughton's signature style- colourful and beautifully simplistic.
This picture book is illustrated with bold and bright pictures about animals at night.

As the story builds up, the pages do too, as you turn the flaps.

The repetition of the text enabled my 4 year old to start making predictions and re-tell the story with me.

After a recent visit to the Greenwich Planetarium, she recognised the drawings on the inside of the cover and identified the main bear characters as part of the constellation of the night sky. Lots of interesting connections can be made!

A lovely, simple bed time reader which we all enjoyed sharing.
