***Mixed feelings on this book. Glad I read it but extremely extremely gruesome and made me feel sick to the stomach.***

*I have read 'Sleepless' before by Simon Cheshire's and I was keen to read another of his books because I enjoy his writing style "scary and moderately gruesome". This book was at another level, although I am glad I read it, it has left me feeling unnerved and quite sick at some of the graphic detailing. It does have a good story line and an unexpected ending. There is a warning of the book "not for younger readers" and I would define this as someone over the age of 16 with a strong stomach and an open mind.*

### Lauren Coffman

*Sam Hunter has just moved across the country, after his family effectively became rich over night. He doesn't struggle with the big move though, instead making friends straight away and meeting Emma, who happens to live next door, and whose family are the pillars of the community. However he soon realises they are not all they seem, and though at first the only person that really believes him is his friend's dad, he keeps going. But how can you escape a family that knows everything...*

***This book was thoroughly engaging and exciting, and though when first reading it I hated the ending, after processing it for a while I realised that though it was unexpected, it was interesting and really made you want to know***

*moref. I would absolutely recommend this book, though not if you don't like gore and horror.*

**Warning: This Book Is Not For The Faint Hearted!**

*And I say that because it's gory. Very gory. But if you're a fan of gore - you will agore this book!*

*It's a chunky 400+ pages of **mystery, thrills, chills and trauma, topped off with a brilliant ending that makes you want to bash your head against a wall and scream, "WHY!?" to the heavens, but in a good way.***

*The writing is solid, the pacing is good, but the characters and plot lack a little depth for me. They felt a tad too simple for such a long story - but it was interesting (and disturbing) nonetheless.*

*Definitely worth your time if you're looking for a good old horror story to challenge the nerves!*

***I have read a couple of horror books in my time and the have all recklessly gripped me, making me finish them within 48 hours; Flesh and Blood was no exception!***

*When Sam Hunter, a budding journalist, moves to No.3 Priory Mews in Hadlington, after his father makes some big money with his song writing, he starts to notice a few strange things. When he decides to check things out for himself, he doesn't know how much danger he could be in and how far the lies go back...*

*When I say something disturbs me, whether it's a book or movie, it usually intrigues me greatly as well. I have read a couple of horror books in my time and the have all recklessly gripped me, making me finish them within 48 hours; 'Flesh and Blood' was no exception! Messed up and gory, 'Flesh and Blood' goes beyond the unwritten boundaries of ordinary books into something completely different that makes my stomach turn and my blood pump with a mixture of excitement, nervousness and horror. The more Sam discovers about the Greenhill's the more you realise he is slowly digging his own grave, unlike this novel however, as it lived up to my expectations and the standard of the other*

*books in this series. I loved this book but I will warn others that if you aren't into scary or gory content then maybe stay away...*

### **Edel Waugh**

*This is the story about a young boy called Sam. He has just moved to a new home in a rich neighbourhood with his family and very quickly comes across a sinister gory crime scene on the way to his first day at a new school. This does not bode well! The story just gets creepier from here on out and I loved it! It becomes very hard to judge who to trust as the story goes on so you are constantly on edge. The author does not shy away from descriptive crime scenes so maybe don't read this late at night or right after your dinner. I recommend this to you if you enjoy a creepy book that will have you up until the early hours reading books that are even more sinister than they first appear. **Fantastic book! Part of a brilliant series by Red Eye.***
